

Great Plains to Business Central - The pain-free process

If your business is currently operating with Microsoft Dynamics GP (Formerly Great Plains) there is now an easy way to access the advantages of its successor; Microsoft Dynamics 365 Business Central.

Organisations migrating to the new cloud-based platform can leverage powerful new tools that deliver more efficient processes, increased productivity and greater visibility across their operations.

Platform changes can be daunting, but Acumen Consulting's meticulous approach to transitions of this nature provides your business with a safe pair of hands to guide you and overcome any challenges.

Signing up to Acumen's free two-hour assessment is the first step to configuring the Microsoft Intelligent Cloud environment and accessing exciting new capabilities.

Microsoft has developed its Intelligent Cloud environment to seamlessly replicate your data to the Business Central Cloud including Great Plains Accounts and Balances, Customers and Open Receivables Transactions, Vendors and Open Payables Transactions and Items and Quantities On-Hand.

Intelligent Cloud also provides multiple device access, anytime and anywhere access, insights to action and business views into your data which is well suited for technical roles and conversations.

Acumen experts will discuss your current challenges, uncover key drivers for migration and then evaluate and compare your current func-

tionality with the new cloud-based opportunity. This will provide clarity and insight into whether your operation is ready to change.

In some cases, it could be better for you to remain in an on-premise version of your current Dynamics system while preparing for a future migration. Either way, Acumen will deliver a tailored migration roadmap to the Business Central Cloud and support your business during this period.

Once your assessment is complete you will be equipped with a report that provides clear understanding of how such a change will affect your operation as well as a strategic implementation plan and budget analysis which includes evaluation of license transition models.

Transitioning to Microsoft Dynamics 365 Business Central will enable you to operate your entire business in a cloud-based application with all the benefits of a highly configurable and customisable ERP platform.

Choosing the right support partner will not only help you determine the best timing for transition but also make it a smooth and risk-free operation so contact us now to book your assessment.

We're Acumen, where consulting truly means something.
